Summary

Introduction

Mulsanne Insurance Company Limited ('MICL', 'Mulsanne' or 'the Company') is an insurance company licensed in Gibraltar, underwriting UK motor insurance business. Mulsanne carries out its functions via the Board of Directors, various Committees and carefully selected, experienced outsourced service providers.

The purpose of this report is to satisfy the public disclosure requirements under the Solvency II directive, as adopted into Gibraltar law by the Financial Services (Insurance Companies) Regulations 2020 "Solvency II") including the Delegated Regulations of the European Parliament and any other local Gibraltar laws and regulations as appropriate. The elements of the disclosure relate to business performance, governance, risk profile, solvency and capital management.

Business and Performance

During the year ended 31 December 2021, Mulsanne wrote £118.9 million of premium. This was an increase on the 2020 written premium of £54.8 million to the Company not renewing a 25% coinsurance agreement in 2021. The business also witnessed organic growth as new schemes of business were added to the portfolio. The Company made an unaudited profit for the year of £4.8 million (2020 - £1.9 million). The Company's net assets as at 31 December 2021 amounted to £40.6 million (2020 - £33.4 million) on a GAAP basis.

Underwriting produced a profit of £3.1 million (2020 - £4.6 million). In 2020, in response to the Covid pandemic, the Company took the decision to liquidate the investment portfolio and crystalized a realized loss before fees of £604k. During the latter part of 2020 and in to 2021 the Company's investment committee redeployed the cash into a limited number of different assets classes that have delivered a positive investment return in 2021. Additionally at the end of 2020 the Company held a small number of investments that were strategic participations. Toward the end of 2021 once of the strategic assets was subject to a corporate action that gave rise to a material realised gain in the year. Net of charges the Company generated investment returns of £5.3 million (2020 – loss £0.45 million). The underwriting profit was predominantly driven by improvements on the most years of account (2018-2020) which included improvements to both the loss ratios and commissions receivable from co-insurance and reinsurance partners. The Company also took action to address some of the poorer performing segments of the book in 2021 along with expanding those segments of the book that are expected to deliver better returns going forward.

Mulsanne purchases both Excess of Loss and Quota Share reinsurance to protect the business against the impact of large losses and to assist with the effective management of capital. Excess of Loss retention is £1 million on the most recent underwriting years. During 2021 the Quota Share ceding percentage was increased such that for the most recent underwriting year the Company on average retains 45% of each and every motor risk with certain schemes being subject to higher ceding percentages.

As a result of the profits generated in 2021, the Company has an unaudited regulatory capital Solvency ratio of 175% of the Solvency Capital Requirement ("SCR") as at 31 December 2021.

In April 2019 the Company purchased a Loss Portfolio Transfer (LPT) reinsurance contract in respect of the 2017 and prior underwriting years. This contract remained in force during 2021.

During 2020 the World Health Organisation declared COVID 19 as a global pandemic and in the early part of 2020 the UK Government introduced various social distancing measures to control the spread of the COVID virus. These measures had a material impact on the motor insurance market including changes to consumer behaviour and policy sales as private car usage fell during lock down. Mulsanne also witnessed changes to claims frequency, cost per claim and levels of claims fraud during the lockdown. As the UK government eased social distancing restrictions the Company witnessed an increase in vehicle usage and claims frequency.

Systems of Governance

Mulsanne operates an outsourced business model and the Company's expenses reflect charges from its outsourced service providers. Day-to-day operational management during the year was outsourced to Mulsanne's insurance manager in Gibraltar, Artex Risk Solutions (Gibraltar) Limited ("Artex"). In 2021 the Company took the decision to move the outsourced insurance management activities to Robus Risk Services (Gibraltar) Limited with effect from 1st January 2022. This service continues to encompass financial accounting, assistance with risk management, Solvency II reporting, company secretarial and compliance services. In addition, other key outsourced services comprise policy administration, the provision of management information and claims handling. These services are outsourced to other entities within the wider group.

The Company has in place systems of governance which are proportionate to the size and complexity of the operation. Such systems, and the underlying processes and procedures, are subject to ongoing review to ensure any required improvements are made.

Over-arching responsibility for governance rests with Mulsanne's Board of Directors. At the time of writing the Board comprises of three Executive Directors and two Non-Executive Directors, one of whom is independent. The Company also operates via three sub-committees: Claims and Underwriting Committee, Risk and Audit Committee and Investment Committee. Responsibility for audit oversight and risk management is currently retained by the Board.

Mulsanne complies with all requirements with regards to key functions and fitness and propriety, with full details provided in section B.

The Company outsources internal audit services to an independent third-party company. During the year the Company put these services out to tender as part of a Group-wide tender process. After careful consideration and due diligence, the Company appointed Mazars LLP to provide internal audit services.

There were no other material changes to the Company's systems of governance during the period.

Risk Profile

Mulsanne has a strong risk management system, with close involvement of the entire Board. Risk is classified into strategic risk, insurance risk, investment risk, liquidity risk, credit risk, concentration risk, operational risk and reputational risk.

Key risks identified by management comprise:

- Underwriting strategy not aligned with wider Group strategy
- Increase in average cost of claims
- Loss of key staff
- Undesirable market segments written
- Inability to place XoL programme, or place the XoL at economically viable levels
- Over reserving by Claims handler
- Breach of GFSC or other regulatory requirements or expectations
- Company falling below minimum solvency requirement
- Increased level of technology costs in cars
- Significantly reduced business volumes

Full detail on risk management is provided in Section C

Valuation for Solvency Purposes

Section D of this report sets out in detail the inputs, bases and methods of recognition and valuation of assets and liabilities, including a comparison between Solvency II and GAAP valuation. The main valuation differences arise from reclassifications and from differences in the valuation of technical provisions.

Capital Management

In April 2019, Mulsanne purchased a retrospective Loss Portfolio Transfer ("LPT") cover to provide protection against adverse development of reserves on the 2017 and prior underwriting years. As part of the Company's capital management plan this LPT arrangement has remained in place during 2021.

The Company continues to use reinsurance and part of the risk management and capital management policy. In addition to the LPT protection, the Company continues to purchase Excess of Loss and Quota share Reinsurance with reinsurers that have a credit rating of A- or better.

A Business and Performance

A.1 Business Information

A.1.1 Company Details

Mulsanne Insurance Company Limited 5/5 Crutchett's Ramp Gibraltar GX11 1AA

Mulsanne Insurance Company Limited ("Mulsanne") is incorporated in Gibraltar and is a company limited by shares. Mulsanne's registered number 101673.

This Solvency and Financial Condition Report covers Mulsanne on a solo basis. While Mulsanne is part of a Group, this is not an insurance group for Solvency II purposes.

A.1.2 Supervisory Authority

Mulsanne is regulated by:

Gibraltar Financial Services Commission P.O. Box 940 Suite 3, Ground Floor Atlantic Suites Europort Avenue Gibraltar

A.1.3 Auditor

Mulsanne's auditors are:

PKF Canillas Europort Avenue Suite 2.1.09 Building 2 Eurotowers Gibraltar

A.1.4 Ultimate Shareholders

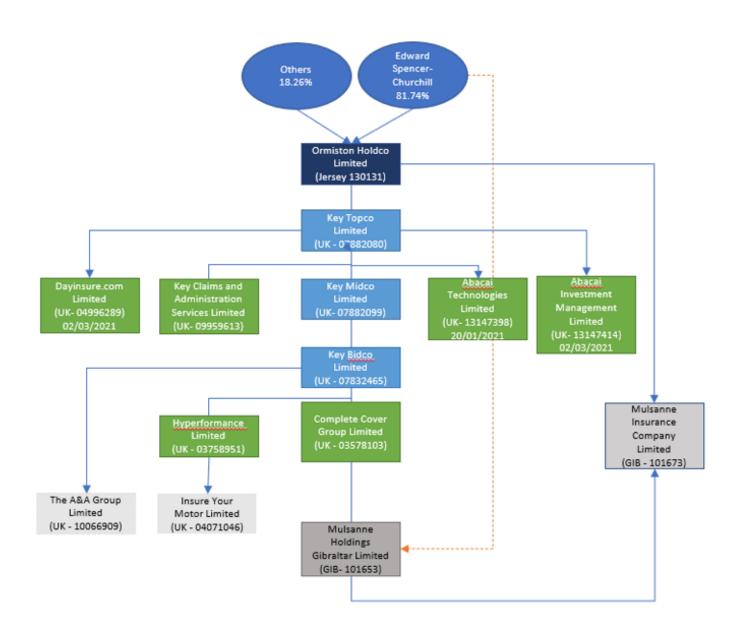

Mulsanne is owned 53% by Ormiston Holdco Limited (a company incorporated in Jersey) and 47% by Mulsanne Holdings (Gibraltar) Limited (a company incorporated in Gibraltar).

As at 31 December 2021, direct and indirect holders of qualifying holdings in the Company are:

Name	Legal Form	Country	Direct / Indirect	Proportion of ownership interest
Mulsanne Holdings (Gibraltar) Limited	Company limited by shares	Gibraltar	Direct	44.16%
Ormiston Holdco Limited	Company limited by shares	Jersey	Direct/Indirect	55.84%/43.34%
Complete Cover Group Limited ("CCGL")	Company limited by shares	United Kingdom	Indirect	43.34%
Key BidCo Limited	Company limited by shares	United Kingdom	Indirect	43.34%
Key MidCo Limited	Company limited by shares	United Kingdom	Indirect	43.34%
Key TopCo Limited	Company limited by shares	United Kingdom	Indirect	43.34%

Assistance	504	2%	627	3%
Miscellaneous Financial Loss	53	0%	78	0%
Total	26,328	100%	22,321	100%

A.1.7 Significant Business or Other Events

As part of the Company's investment policy, only assets not covering technical provisions are invested in less liquid assets or unlisted investments that are strategic in nature. These less liquid investments are limited to a small number of assets. During Q4 2021 one of these assets was subject to a corporate action that gave rise £5.15 million realized gain. The sale proceeds have been invested into more liquid investments. In 2020 the Board agreed with the Gibraltar Financial Services Commission that a capital add-on would be applied to the Solvency Capital Requirement in respect of the Company's unlisted investments. As at 31 December 2021, due to the realised gain on one of these illiquid assets the value of the capital add-on was nil (2020 - £2.9 million).

A.2 Underwriting Performance

Mulsanne underwrote mainly motor business during the year, with a small amount of add-on products. All business was written in the United Kingdom.

The Company mitigates its risk through a mixture of Quota Share reinsurance, Excess of Loss reinsurance and on prior years an LPT contract and co-insurance arrangement. This provides protection both against adverse performance from attritional losses and from large claims.

Mulsanne prepares its financial statements in accordance with Generally Accepted Accounting Principles in Gibraltar ("GAAP") and the underwriting performance information given in this section is therefore on a GAAP basis.

The following table summarises the technical account performance for the year ended 31 December 2021 with a comparison for 2020.

			As at 31 December 20	21	
			Miscellaneous		
	Motor Liability	Other Motor	Financial Loss	Assistance	Total
	£'000	£'000	£'000	£'000	£'000

Balance on the technical account	4,954	489	(17)	65	5,491

The company has advanced its move to using Actuarial pricing methods. We have built new versions of our short term and Private Car rating and are looking to deploy the PC models via our IHR platform. We continue to focus on our use of data and enrichment and anti-fraud techniques.

A.3 Investment Performance

During 2021 the Company continues to invest surplus cash via a small number of investment funds in different asset classes. These funds are highly diversified and are typically listed. Additionally, the Company has a relatively small exposure to a handful of property related loans via a protected cell company investment structure.

The Company continues to invest funds in accordance with the Prudent Person Principal, and investments supporting technical provisions remain highly liquid.

The Company holds investments in a small number of less liquid unlisted investments. On an annual basis the Company obtains an independent valuation of these less liquid assets and the value of these assets is reflected in the financial statements of the Company.

The Company's investment portfolio comprises:

	As at 31 Decem	As at 31 December 2021 As at 31 December 2021		mber 2020
	Amount	% of Total	Amount	% of Total
	£'000	%	£'000	%

Total	9,112	100%	(447)	100%

Mulsanne uses the services of experienced investment managers and advisors to manage and advise its portfolios and these investments are actively managed, with assets not necessarily held until maturity. Investments are reviewed by the Investment Committee and Investment working committee.

Mulsanne does not invest in securitisations and has not recognised any gains or losses directly to equity.

A.4 Performance of other Activities

Mulsanne receives co-insurance and reinsurance commission with respect to costs incurred by the Company. The table below shows the net amounts in the year. The value of commissions received is in part linked to the underlying underwriting result of the company.

	31/12/2021 £'000	31/12/2020 £'000
Co-Insurance commission	2,002	1,377
Reinsurance commission	9,381	6,371
Reinsurance Profit Commissions	524	1,850
Total	11,907	9,598

A.5 Any other Information

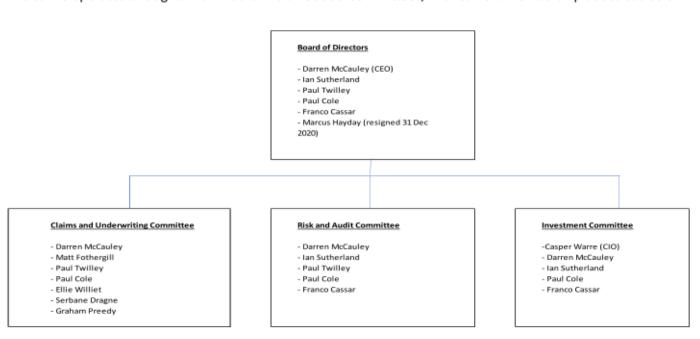

There are no other material matters with regard to the Company's performance.

B Systems of Governance

B.1 General Information on Systems of Governance

B.1.1 Structure of the Board and Committees

Mulsanne operates through a main Board and three Sub-Committees, with current membership as set out below:

Mulsanne's Company Secretary is Robus Risk Services (Gibraltar) Limited

During the year ended 31 December 2021, the Company formed a Risk and Audit Committee.

The Board is responsible for overseeing the business of Mulsanne, for providing strategic direction and for supervising management. While the Board delegates certain functions to Sub-Committees, this does not absolve the Directors of their responsibility to the Company.

The Board operates under agreed Terms of Reference which set out the following key responsibilities:

- Setting the strategic direction and objectives of the Company
- Ensuring the integrity and reliability of the Company's finances, including
 - Business planning
 - Capital and Solvency position
 - Directors' remuneration
 - Dividend policy
 - Accounting policies
 - Approval of public documents
- Approving, managing and monitoring the internal and external audit strategy and the performance and effectiveness of the external and internal auditors
- Establishing an appropriate internal control system and monitoring its effectiveness
- · Approving the underwriting strategy and policy and monitoring its implementation
- Overseeing the calculation of the SCR and technical provisions
- Overseeing, guiding and challenging the ORSA and approving the ORSA report
- Overseeing the completion of quarterly and annual QRTs, the SFCR and the RSR

The Company has in place a Claims and Underwriting Committee, which operates under agreed Terms of Reference approved by the Board. The key responsibilities of the Committee include:

- Implementing and overseeing the claims handling, reserving and settlement strategy and philosophy
- Overseeing the performance of all product lines and intermediaries/distributors
- Receiving, considering, reviewing, challenging and agreeing recommendations and proposals for changes to the underwriting and/or rating
- Considering business opportunities and underwriting proposals presented by management
- Assisting with the negotiation, placement, performance and monitoring of the reinsurance arrangements
- Providing input into the calculation of the SCR and technical provisions
- Providing input into the ORSA process
- Considering and advising on insurance risk management, including risk identification, controls, appetite and mitigation
- Monitoring and reporting on market trends and legislative or regulatory changes
- Reporting on all relevant matters to the Board

The Company has in place an Investment Committee, which operates under agreed Terms of Reference approved by the Board. The key responsibilities of the Committee include:

- · Providing guidance on, managing and monitoring the investment and cash flow strategy
- · Overseeing the performance of investments and investment managers
- · Advising on investment risk strategy and policy and risk appetites and limits
- Providing input into the calculation of the SCR
- Providing input into the ORSA process
- Ensuring appropriate information is required for regulatory reporting purposes
- Reporting on all relevant matters to the Board

The Company has in place a Risk & Audit Committee, which operates under agreed Terms of Reference approved by the Board. The key responsibilities of the Committee include:

- Establishing an effective risk management framework including risk management strategies and policies and risk
 appetite and tolerance limits.
- Overseeing the performance and continued independence of the appointed internal and external auditors
- Receiving, considering, reviewing, challenging and agreeing recommendations and proposals following internal and external audits
- Providing oversight and challenge to the effectiveness of the governance framework
- Review guidelines and policies that govern the processes by which management operate
- Receive and consider quarterly reports from the Compliance Function including the analysis of complaints

B.1.2 Key Functions

Mulsanne has in place the four key functions as required by the Solvency II Directive. These are:

- Risk Management
- Compliance
- Actuarial
- Internal Audit

These functions are responsible for providing oversight of the relevant area and providing assurance to the Board on the operation of the Company's risk management framework. All functions are overseen by Directors of the business, thus ensuring they have the appropriate authority to carry out their roles.

B.1.2.1 Risk Function

The Board of Mulsanne retains full responsibility for the risk function. The function is overseen by Paul Cole.

The function holder is supported in his role by the outsourced service providers, including the Company's insurance manager and the third-party administrator, who provide input into and assistance with risk management.

The Board has retained responsibility for risk management and the function therefore has the required authority to fulfill its role.

B.1.2.2 Compliance Function

Mulsanne outsources compliance services to its insurance manager, with the function being overseen by Marcus Hayday during the year. The compliance team works closely with the wider group in providing compliance services to the Company. As part of the transfer of insurance management services to Robus, compliance services are now overseen by Kerris Fryer.

The Board has approved a compliance monitoring programme, which is updated on an annual basis, and is intended to ensure that Mulsanne complies at all times with all relevant rules, regulations, legislation and guidance to which the Company is subject, both in Gibraltar and, where applicable, in the UK.

Being outsourced, the function is operationally independent from the other areas of the business and, while it reports to the Board, the Board is not able to influence the function or to exert other inappropriate pressures. The Compliance function is authorised to access all areas of the business and is therefore entitled to full and unrestricted access to all information, records, property, personnel and activities, including those residing with outsourced service providers.

The Compliance function formally reports to the Risk and Audit Committee on a quarterly basis.

B.1.2.3 Actuarial Function

The Actuarial Function has specific duties and responsibilities under Solvency II. Mulsanne outsources the actuarial function services to RTP Consultancy, under oversight of Darren McCauley as the Actuarial Function Holder. The outsourcing arrangement ensures that the actuarial function is operationally independent. Specific duties of the Actuarial Function include, but are not limited to:

- Coordinating the calculation of the firm's technical provisions
- Assessing the sufficiency and quality of the data used in the calculation of technical provisions against the data quality standards as set in Solvency II
- Informing the Board of the reliability and adequacy of the calculation of technical provisions
- Expressing an opinion on the overall underwriting policy
- · Expressing an opinion on the adequacy of reinsurance arrangements
- · Contributing to the effective implementation of the risk management system
- Preparing the Actuarial Function Report for the Board at least annually

In addition, Mulsanne utilised the services of an external actuary, Grant Thornton, to carry out annual reserve reviews and provide an element of operational independence.

B.1.2.4 Internal Audit

Mulsanne's Internal Audit function is overseen by Paul Cole. Internal Audit is responsible for evaluating the approach to risk management and governance, with particular emphasis on the internal control system.

During the year ended 31 December 2021, Mulsanne outsourced the Internal Audit function to Mazars LLP, who had the skills, knowledge and expertise to provide the services and were entirely independent from operational aspects of the business.

B.1.3 Changes during the Period

During the year the Board reviewed the services provided by the Gibraltar insurance manager and after due consideration took the decision to move the insurance management services to Robus Risk Services (Gibraltar) Limited ("Robus"). The services effective date for Robus was 1 January 2022.

During the year the Company change service provider in respect of internal audit services as part of a Group wide tender process. After due consideration Company appointed Mazars LLP to provide internal audit services in 2021.

There were no other changes during the period.

B.1.4 Remuneration Policy

Mulsanne does not have any employees other than the Directors of the Company. The Independent Non-Executive Director is the only individual to receive remuneration from the Company. All other Directors are remunerated elsewhere.

Due to the size of the Company and the simple remuneration arrangements, Mulsanne does not have a separate Remuneration Committee, with responsibility for this area being retained by the Board.

The Independent Non-Executive received a fixed fee and there were no variable or performance-related elements to the remuneration. The remuneration of other Directors is not linked directly to the performance of the Company and none of the Directors are entitled to share options or shares in the Company and do not have any entitlement to pensions from Mulsanne.

B.1.5 Material Transactions

During the year, Mulsanne paid a fee of £250,000 (2020 - £250,000) to its insurance manager for services provided. Two of the Directors were also Directors of the insurance manager during the course of the year. At 31 December 2021, the balance owed by Mulsanne was £nil.

B.2 Fit and Proper Requirements

B.2.1 Requirements for Skills, Knowledge and Expertise

Mulsanne requires that members of the Board and Committees and those individuals carrying out other significant functions are fit to carry out their roles through the possession of the necessary skills, knowledge and experience and that all such individuals are of good repute and integrity. This ensures an appropriate spread of skills for managing the business.

The fitness requirements set out that collectively the Board and Committees cover at least the following areas:

- Knowledge of insurance and financial markets
- Understanding of the business strategy and the business model
- Understanding of the systems of governance
- Knowledge of financial matters, actuarial analysis and management information
- Understanding of the regulatory framework and requirements

B.2.2 Policies and Processes with regard to Fit Requirements

The Board will consider the skills, knowledge and experience required prior to any new appointment and assess whether the individual meets the requirements. On an ongoing basis, all individuals are required to ensure that their skills and knowledge are kept up-to-date and to confirm this annually. The fitness of key individuals is monitored and reported on by the compliance function.

B.2.3 Policies and Processes with regard to Proper Requirements

All individuals carrying out key or significant functions for Mulsanne are required to demonstrate that they meet the Company's proper requirements with regard to their reputation and character. In order to assess whether this requirement is met, the following factors will be considered:

- the individual's character;
- the individual's personal behaviour;
- the individual's business conduct;
- any criminal aspects;
- any financial aspects;
- any regulatory aspects.

Mulsanne's compliance function ensures that appropriate Notification Documents are prepared for all individuals carrying out notifiable functions and submitted for regulatory approval. The compliance function is responsible for checking propriety on an ongoing basis and to report to the Board at least annually.

B.3 Risk Management System including ORSA

B.3.1 Risk Management System

B.3.1.1 Overview

Mulsanne categorises its risks as follows:

- Strategic Risk
- Insurance Risk
- Investment Risk
- Liquidity Risk
- Credit Risk
- Concentration Risk
- Operational Risk
- Reputational Risk

Mulsanne's aim is to ensure that the business is managed at all times in a risk-focused manner in order to achieve the Company's overall strategic objectives. The Company has in place policies, processes and procedures for each category of risk.

Risk management is the responsibility of the Board. However, due to the small size of the Company, it depends on assistance from individuals within its outsourced service provider, in particular its insurance manager and third-party administrator.

The system of governance is based on the principle of proportionality, such that systems are proportionate to the nature, scale and complexity of Mulsanne's operations.

B.3.1.2 Risk Management Strategies, Objectives, Processes and Reporting

Mulsanne's risk management policy is intended to identify all material risks, minimise risks wherever possible and manage and control all significant risks within acceptable limits. The ultimate goal is to ensure policyholder protection, both now and in the future and for the company to achieve the Company's overall strategic objectives.

The Company sets risk appetite and tolerance limits for each category of risk and monitors performance on a monthly basis.

B.3.1.3 Identification, Measurement, Monitoring, Management and Reporting of Risks

Mulsanne's Risk and Audit Committee regularly discusses and considers actual or potential risks and utilises a Risk Register to do so. All risks identified are recorded and assessed as to their impact and the likelihood of their occurrence, both on an inherentbasis (before controls and mitigations) and on a residual basis (after taking account of appropriate controls and mitigations).

The highest rated risks are reported to the Board on a regular basis by the Compliance function. In addition, at each Board meeting consideration is given to whether the Company's risk profile or risk exposure has changed due to decisions taken.

Risk events are reported to the Board when they occur and are recorded in the Risk Register, including their impact and resolution.

Risk management involves the Board as well as key outsourced providers. All forums and individuals involved in risk management have a duty to inform the Compliance, Internal Audit or Actuarial functions of any facts that may be relevant to these functions in performing their duties.

In addition, the Board will receive regular reports from the Internal Audit function as to the adequacy, effectiveness and efficiency of the internal controls.

B.3.1.4 Implementation of Risk Management Function

The Risk and Audit Committee is responsible for the risk management function. While the Company relies on its outsourced service providers for elements of the day-to-day operation of risk management, oversight and control remains with the Board. This ensures that risk management is fully integrated into Mulsanne's business and its decision-making processes.

Mulsanne operates a three-line of defence model as set out below:

ExternalAudit Risk and Audit Second Line of Defence Third Line of Defence First Line of Defence Business Management Senior Management Internal Audit (both in-house and Compliance Function Independent External outsourced) Actuarial Function ActuarialFunction - Policy administration Claims handling Finance function Risk Owners Claims and Underwriting Committee Investment Committee

First line of defence: Responsible for the day-to-day management and control of risk and the establishment and operation of appropriate internal control measures.

Second line of defence: Responsible for operation of the risk management framework and oversight of risk control and management. It has a level of independence from the day-to-day management and provides the Board with some assurance over the effectiveness of the risk management system.

Third line of defence: Responsible for providing independent assurance on the effectiveness of the first and second lines of defence and over the risk management framework and system of internal controls.

B.3.2 Own Risk and Solvency Assessment

B.3.2.1 ORSA Process and Integration

Mulsanne has established a policy setting out the requirement to carry out an Own Risk and Solvency Assessment ("ORSA"). The purpose of the policy is to ensure that all material risks faced by Mulsanne are appropriately assessed and the level of capital required managing these risks or other risk mitigation measures are determined and put in place. The ORSA should provide the Board and management with a thorough understanding of the Company's risk profile and provide the information needed to make appropriate decisions.

The ORSA takes account of historic performance and future forecasts/budgets over the business planning horizon, which is a period of three years. Various members of the management team and relevant outsourced providers will carry out the ORSA. The Mulsanne Board maintains oversight and control at all times, steering how the assessment is performed and challenging the results to ensure they properly take account of the Company's material risks.

Mulsanne conducts at least an annual ORSA after which a formal report is prepared.

As part of the ORSA process, management assess the risks to which the Company is exposed and their potential impact on the capital requirement together with any other relevant mitigating factors. This consists of both a quantitative assessment through appropriate stress and scenario tests, as well as a qualitative assessment of risks which may not be covered by capital. The outcome from the ORSA process is to determine the level of capital which the Board consider appropriate for the business.

A full reforecast and ORSA will be carried out on an annual basis, subject to there being no material changes in the business or its risk profile in the meantime. This will take place during the final month of the company's financial year, thus ensuring that the timing is aligned with the business planning process.

In addition to the above, the Board will formally assess on a regular basis whether any decisions taken, risk events, market factors or other similar items affect Mulsanne's risk profile, risk appetite, free reserves or other relevant matters. In such a case, the impact on the Company's own assessment of its capital needs will be considered and, if required, a further ORSA together with an SCR calculation will be carried out.

In particular, the following thresholds will require an automatic revision of the ORSA, regardless of other circumstances:

- Volumes increasing by more than 10% above budget, and the forecast performance of the business is such that management feel that this will continue
- Net Loss Ratio (Net of Excess of Loss reinsurance) in any underwriting year deteriorating by more than
 - 5 points compared to budget on the current UWY

- 3 points compared to previous actuarial review on prior UWYs
- New material business lines (>£7.5m of premium) being entered into
- The solvency buffer falling below 10%, and forecast performance of the business being such that management feel the SCR buffer will continue to be eroded post the 10% breach.

The ORSA is conducted by management, including outsourced service providers, with the Board maintaining oversightand control at all times and steering the assessment. The draft report produced is provided to the full Board for discussion, challenge and approval. This is applicable for each ORSA, whether annual or ad-hoc due to changes in thebusiness.

B.3.2.2 Relationship between Solvency Needs, Risk Profile, Capital Management and Risk Management
The ORSA enables the Board to assess the Company's capital needs over the planning horizon, which is three years.
The ORSA is carried out taking due account of Mulsanne's specific risk profile and includes both risks explicitly captured in the Standard Formula, as well as risks which are either not captured or not able to be mitigated through capital. Allrisks are taken into account in the ORSA process.

The capital management policy has been established to ensure that the Company has in place the appropriate levels and quality of capital both as required by the SCR calculation and as determined by the ORSA. The policy aims to ensure that appropriate plans are in place to enable the Company to meet its capital requirements both in the immediate and the medium-term future and that all items of own funds comply with the relevant rules, regulations and legislation.

The risk management function takes due account of the available capital, the Company's risk profile, future business plans and the outcome of the ORSA in an iterative cycle.

B.4 Internal Control System

B.4.1 Internal Control System

Mulsanne is committed to managing its business in a risk-focused manner. In order to achieve this, appropriate controls have been put in place to reduce risks where possible. Risk management and the adherence to the internal controls are an integral part of the business culture.

Responsibility for establishing an appropriate internal control environment rests with the Board as a whole and its Directors individually. The Company has established internal control systems which take due account of the nature of the business. Responsibility for adherence to internal controls rests with all individuals involved in the management of the business.

The internal control policy is targeted at ensuring that:

- Processes and procedures exist for the identification and assessment of risks
- Appropriate processes and procedures are in place to control identified risks
- Individuals involved in the business are trained and aware of their role with regard to internal controls
- Appropriate monitoring and review processes are in place

Key controls that operate to mitigate risks are recorded in the appropriate Risk Register. The internal control framework for Mulsanne is subject to review by Mulsanne's internal audit function.

B.4.2 Compliance Function

B.4.2.1 Implementation of Compliance Function

The compliance function is an integral and significant element of Mulsanne's business, responsible for ensuring the Company complies with all relevant rules, regulations, guidance and legislation with regard to both Gibraltar and UK requirements. The compliance function also reports to the Board on any relevant changes in the legal environment in which the Company operates.

Mulsanne outsources its Compliance function to its insurance manager, with a named Compliance Officer having overall responsibility. The compliance function has established a Compliance Monitoring Programme which is approved by the Board on an annual basis. Compliance formally reports to the Board on a quarterly basis with regard to the tasks carried out during the quarter.

While the provision of compliance services has been outsourced, this remains under the oversight of the Mulsanne Board, in particular the function holder, and the Board retains full responsibility.

B.4.2.2 Independence and Authority of Compliance Function

Due to the outsourced nature of the compliance function, the function is operationally independent from the other areas of the business.

The compliance function is authorised to access all areas of the business and is therefore entitled to full and unrestricted access to all information, records, property, personnel and activities, including those residing with outsourced service providers.

The Board considers and approves the compliance monitoring programme on an annual basis to ensure that all relevant areas are captured and receives the quarterly compliance reports, but does not otherwise seek to instruct or influence the Compliance function.

B.5 Internal Audit Function

B.5.1 Implementation of the Internal Audit Function

Internal Audit is an objective and independent activity, whose role is to help management achieve the Company's objectives by constantly improving the effectiveness of the Company's operations. It is responsible for evaluating management's approach to risk management and governance, with particular emphasis on systems of internal control. It investigates the manner in which the Company's processes and controls operate in order to assess their effectiveness in ensuring compliance with strategy and policies.

Mulsanne's Internal Audit function covers all aspects of the Company's business. In particular, it will consider:

- Governance and business planning
- o Underwriting and policy administration
- Claims handling and reserving
- Investment
- Finance/Accounting
- o IT
- Compliance

Internal Audit produces a three-year plan to ensure that all relevant areas are covered within an appropriately determined timeframe, taking into account the relevant risks and uses this plan as the basis for the detailed annual plan. Internal Audit carries out its examination at least once per annum and as requested on an ad hoc basis on any additional areas.

Mulsanne outsources the Internal Audit function to an external accountancy firm.

A number of internal processes and procedures will be taken into account by the outsourced provider in discharging their duties:

- The Board, with the assistance of its insurance manager, carries out an internal review of the governance, risk management and business planning systems and processes, including its own procedures, on an annual basis
- Members of the CCGL team working for Mulsanne, together with Artex if required, carry out periodic audits
 of the claims-handlers and brokers and report to the Board, these audits to be conducted at least annually
- Internal Audit will liaise with and leverage the work of the external auditors

After each audit, appropriate reports are produced.

- An initial report is produced for discussion with management in the relevant area. The draft report should be produced no later than four weeks of the audit work finishing.
- Management's responses and proposed actions will be noted and an agreed final report will be issued. The
 final report should be issued no later than four weeks of the draft report being agreed.
- The final report will be submitted to the Board for review at the next meeting.

B.5.2 Independence and Objectivity of the Internal Audit Function

Internal Audit is outsourced to an external accountancy firm with the required skill set and experience and is not involved in any operational aspects of the business. This ensures that the function is independent, objective, and impartial and not subject to influence from the Board or management.

Internal Audit is authorised to review all areas of the Company and its business and is therefore entitled to have full and unrestricted access to all information, records, property, personnel and activities. Staff and management (even if

not staff of the Company) have a duty to make all requested information available promptly and to assist with any enquiries.

The Board will approve the audit plan and is free to request additional areas to be reviewed by internal audit. In addition the Board receives and reviews the reports produced by the function. However, the Board does not otherwise seek to instruct or influence the Internal Audit team.

B.6 Actuarial Function

B.6.1 Implementation of Actuarial Function

The role of the Actuarial Function is to provide the Board with an independent perspective on key insurance aspects of the Company's operations. This will ensure that the Board is fully informed of matters that may impact the business.

Mulsanne's Actuarial Function covers all aspects of the business with regard to insurance risks. This encompasses:

- Underwriting
- Reinsurance
- Other risk mitigations
- Reserving
- Capital
- Data

Mulsanne outsources the Actuarial Function services to a qualified, external actuary who provides the services under oversight of the Actuarial Function Holder and ultimately the Board.

The Actuarial Function is responsible for the following areas:

- Oversight and validation of the calculation of technical provisions
- Assessment of the appropriateness of methodologies and assumptions used and consistency with Articles 76 to 83
- Explanation of any material changes in data, methodologies or assumptions
- Assessment of the sufficiency and quality of the data and consistency with data quality standards
- Recommendations to improve data quality where required
- Back-testing of best estimates against actual experience, reporting of material deviations and proposals to improve calculation
- Opinion on overall underwriting policy
- · Opinion on adequacy of reinsurance arrangements

The Actuarial Function reports its findings to the Board at least annually, covering all areas for which it is responsible. The report should be appropriate to assist the Board in its decision-making process and to identify to the Board areas where improvements are required. The report should also identify any material uncertainty about data accuracy and explain the approach taken in light of this uncertainty.

B.7 Outsourcing

B.7.1 Outsourcing Policy

Outsourcing is defined as the contracting out of all or part of an internal process or internal activities to a third-party provider on a continuous basis. Mulsanne has in place an outsourcing policy which ensures that all outsourcing will:

- Support Mulsanne's business strategy and key objectives
- Provide customers with an experience at least as good or better than an in-house alternative
- Enable Mulsanne to deliver a service experience to customers at a cost consistent with the Company's cost objectives/budget/business plan
- Enable Mulsanne to exercise control over outsourced service providers to ensure that any risks are properly identified, understood and appropriately mitigated
- Enable Mulsanne to demonstrate that its responsibilities in respect of outsourced activities are beingeffectively discharged

While Mulsanne outsources certain key activities, the Company retains all decision-making powers and ultimate responsibility for the outsourced services.

Mulsanne's outsourcing policy sets out the following:

- The definition of outsourcing
- Responsibility for implementation and operation of the policy and consequent controls and processes
- The criteria for outsourcing
- Due diligence on potential providers
- Establishment of appropriate contractual arrangements which clearly define responsibilities and allowadequate supervision and control
- Establishment of appropriate contingency planning, including terminating or exiting the arrangement
- Periodic audit requirements
- Records of outsourced arrangements
- The approval process
- Contract and legal requirements
- Risk assessment and risk mitigation measures
- · Monitoring and on-going requirements

B.7.2 Outsourced Functions and Activities

The following table sets out the key functions outsourced by Mulsanne:

Function/Services	Jurisdiction
Policy administration and processing including provision of management information	United Kingdom
Claims handling, reserving and settlement	United Kingdom
Accounting and financial services	Gibraltar
Assistance with risk management	Gibraltar
Compliance services	Gibraltar United Kingdom
Company secretarial services	Gibraltar
Actuarial function services	United Kingdom
Internal audit	Gibraltar
Large loss reserving	Gibraltar

B.8 Any other Information

B.8.1 Adequacy of Systems of Governance

Mulsanne is a small company with the directors closely involved in all key aspects of the business. The Company does not underwrite complex insurance products, focusing mainly on a single line of business, with known and fully understood risks. The systems of governance have therefore been established taking due account of the principle of proportionality, being appropriate to the size, nature and scale of the operations.

The Board has in place a process of regularly evaluating the effectiveness of the systems of governance. In addition, governance falls within the remit of both internal and external audit and the risk management function continuously assesses relevant legislation, guidance, advice and best practice to ensure that the systems of governance are updated and maintained at all times.

B.8.2 Any other Material Information

There is no other material information to report as at 31 December 2021.

C. Risk Profile

Mulsanne's governance framework sets out the type and level of risk which the Company is willing to accept in the achievement of its strategic objectives. This framework provides both qualitative and quantitative measures and limits, which are taken into account in making key business decisions.

Mulsanne's appetite is for the business to focus mainly on motor risks together with a small volume of ancillary, motor-related risks. All business is underwritten in the UK.

With regard to investments, Mulsanne pursues a strategy which is focused on capital preservation whilst seeking to achieve investment returns that are better than cash deposits through diversified investment funds on a carefully selected basis, thus adopting a careful and conservative investment policy.

Mulsanne's risk profile at 31 December 2021 is set out in the table below:

	2021	2020
Risk Category	% of SCR	% of SCR
Insurance Risk	40.3%	39.6%
Market Risk	31.2%	31.6%
Counterparty (Credit) Risk	13.2%	13.4%
Operational Risk	15.2%	16,8%

C.1 Underwriting Risk

C.1.1 Material Risks

Underwriting risk arises from the risk of loss from changes in insurance liabilities. This can arise from inadequate pricing or risk selection, inappropriate reserving, or other fluctuations in the timing, frequency and severity of insured events.

Mulsanne distributes all business via intermediaries in a highly competitive industry. Furthermore, the motor market has recently been subject to numerous regulatory and legislative changes and is highly sensitive to the economic environment, the behaviour of policyholders and actions of other service providers to the industry, such as claimant lawyers and claims management companies.

The Company manages underwriting risks through regular review of performance information, encompassing loss ratios, frequency, and cost of claims by products and distribution channels. As we serve a lot of our private car schemes from our insurer hosted rating platform we have invested in being able to monitor conversion rates by scheme.

The following are the key underwriting risks identified by management:

- Undesirable market segments written
- Inability to place XoL programme at economically viable levels
- Usage of cars as weapons
- Underwriting strategy not aligned with group strategy

C.1.2 Material Risk Concentrations

The majority of Mulsanne's business comprises motor insurance, therefore leading to some risk concentration due to exposure to market factors. However, within this class of business, Mulsanne writes a variety of different categories of risks, including private cars, commercial vehicles, fleets, and taxi business. In addition, distribution is through a number of intermediaries. The Directors therefore do not consider there to be any material underwriting risk concentration.

C.1.3 Risk Mitigations

Mulsanne mitigated underwriting risk through the purchase of reinsurance protection and the implementation of appropriate controls.

Mulsanne purchases Excess of Loss reinsurance to protect against the impact of large claims. In addition, the Companyhas in place co-insurance and Quota Share reinsurance arrangements to mitigate the impact of large and lower value, attritional losses.

In April 2019 and with effect from 1 January 2019, the Company purchased a new Loss Portfolio Transfer to cover business written up to 31 December 2017, to protect against adverse claims performance. As at the time of writing this report this Loss Portfolio Transfer cover remains in place.

In addition, Mulsanne further mitigates underwriting risk through the following:

- Monthly review of performance information
- · Systematic reviews of individual risks to ensure pricing is within agreed parameters
- Post inception audits of risks
- Six monthly independent actuarial reviews and quarterly roll-forwards
- Regular audits of intermediaries
- · Regular audits of the claims-handler
- · Regular updates of the risk register, including reporting of any risk events
- Stress testing of loss ratios as part of the ORSA process
- · Risk mix index to review rating strength
- Move to centralized rating platform for PC rating

C.1.4 Stress and Sensitivity Testing

Mulsanne carries out stress and sensitivity testing as part of the ORSA process, which is carried out at least annually. This considers stresses both with regard to business volumes, future loss ratios and the run-off of existing reserves. This showed that the greatest sensitivity arises from changes in future loss ratios driven by bodily injury or deterioration in existing reserves. This is entirely in line with expectations and aligns closely with the management focus on the profitability of new business.

Under extreme scenarios, the level of buffer and protection afforded by the recently purchased Loss Portfolio Transfer would not be sufficient to absorb this stress. Management is very much alive to the risks arising from inappropriate underwriting and continues to closely monitor this risk. Further to this the Board, as part of the ORSA process considers options available to it to recover from such extreme scenarios as part of the company's recovery and resolution planning.

The Company's most significant variable in respect of the projection of ultimate losses attaches to the assumptions used for large bodily injury claim frequency. The frequency of these claims, by definition, are difficult to predict.

C.2 Market Risk

C.2.1 Material Risks

Market risk arises from changes in the income generated by investments or from changes in the value of such investments and includes:

- Interest rate risk
- Spread risk
- Equity risk
- Currency risk
- Property risk
- Concentration risk

Mulsanne pursues a diversified investment policy focusing on the generation of real returns above inflation whilst seeking to observe the Prudent Person Principle. The Company holds some investments that are denominated in US Dollars. In order to mitigate the risk of adverse movements in the value of these assets that may arise through movements in foreign exchange rates, the Company has purchased foreign exchange forward contracts to hedge currency risk. The value of this currency forward hedge is reviewed regularly and adjusted as appropriate to ensure the Company's exposure to currency risk is minimized. The counterparty for the currency hedge transaction is an "A" rated bank.

Mulsanne uses the services of carefully selected and experienced investment managers and advisors who operate under an approved investment policy and within agreed guidelines. As well as setting limits with regard to the type of investments and the rating of counterparties, the policy sets a benchmark return and imposes limits on exposure to single counterparties. The Investment Committee meets on a regular basis to assess the performance of the portfolioand recommend any changes which may need to be made.

The main market risk to which the Company is exposed is a loss in the value of investments or categories of investments due to market factors.

C.2.2 Material Risk Concentrations

Mulsanne has in place a diversified investment portfolio and is therefore not exposed to any material market risk concentration with the investment portfolios.

The Company also holds several unlisted debt and equity investments. The total value of these assets is £22.54 million. The largest concentrations are in respect of two equity investments that are valued at £4.23 million and £3.7 million each.

As at 31 December 2021 the Company held £19.04 million with RBS International. During 2021 this balance has increased due to the operational net cash inflow of the business.

C.2.3 Risk Mitigations

Mulsanne mitigates market risk through the following mechanisms:

- Regular review of investment performance
- Use of more than one investment manager and an independent advisor
- Investment policy with agreed limits
- · Diversification within the investment portfolio

C.2.4 Prudent Person Principle

Mulsanne pursues an investment policy, which ensures investments are limited to relatively standard and easily understood products, the performance of which the company is able to readily monitor and manage. The investment policy balances capital preservation with investment return and sets limits with regard to rating and other measures, taking into account the nature and duration of the Company's liabilities. In addition, the policy requires appropriate diversification of exposure within the portfolio.

Mulsanne only utilizes derivatives for hedging purposes and these are fully taken into account in the ongoing performance of the portfolio. For assets supporting technical provisions, the Company's policy is to hold investments that are traded regularly and therefore have a ready market value and are highly liquid. Assets that are less liquid, or do not have a readily realisable market value are kept to prudent levels.

Occasionally, the Company may choose to invest in funds which themselves invest in more unusual or complex instruments, potentially including derivatives and securitised investments or other instruments. In such a case, the Company will carry out appropriate diligence on the investment or fund manager to ensure that they have the required skill, knowledge, understanding and experience to manage any additional risk which may arise from such investments.

Mulsanne does hold several investments that are less liquid and less easy to realise. For these assets the Investment Committee will:

- Assess the impact on the Company's risk profile, consider whether a revised ORSA is required as a result and make the necessary recommendation to the Board;
- Ensure that appropriate skills are in place to manage and monitor the investment activity either internally
 or within the investment manager;
- Assess how the investment complies with the Prudent Person Principle;
- That such investments are in the best interest of customers and policyholders;
- Demonstrate to the Board how the proposed investment activity will improve the portfolio as a whole.

C.2.5 Stress and Sensitivity Testing

Mulsanne includes stress testing of market risk in its ORSA process, in particular with regard to a shock to the risk free interest rate used to discount cash flows under Solvency II and a shock to the bond market resulting in a fall in value of the investments. While these stresses do not impact as greatly as loss ratios stresses, a severe shock has the potentialto adversely affect the Company's capital position.

C.3 Credit Risk

C.3.1 Material Risks

Credit risk arises from the risk that parties who owe money to Mulsanne are unwilling or unable to pay the amounts due to the Company. Credit risk for Mulsanne arises from a number of sources:

- Banking counterparties
- Reinsurance counterparties
- Issuers of fixed income securities and debt instruments
- Premiums due from intermediaries

Mulsanne aims to minimise the credit risk arising from its operations through the careful section of counterparties and close management and control of amounts due to the Company.

C.3.2 Material Risk Concentrations

Mulsanne's credit risk exposures during the year were diversified as set out below:

- Funds were held with more than one banking counterparty
- Reinsurance exposure is diversified between more than one counterparty
- Mulsanne's investment portfolio comprises diversified investment funds
- The Company uses a number of different intermediaries in distributing its products
- · Reinsurance counterparties are highly rated

C.3.3 Risk Mitigations

Mulsanne mitigates credit risk through a number of mechanisms:

- Ensuring distribution is via multiple intermediaries
- Carrying out periodic audits of brokers
- · Establishing and monitoring credit terms for brokers
- Using an experienced reinsurance broker
- Ensuring reinsurance counterparties are appropriately rated
- Monitoring reinsurance recoveries
- Ensuring banking counterparties are appropriately rated
- Use of statutory trust accounts where appropriate
- Requesting that funds wherever possible are not comingled
- Reviewing credit terms and avoiding terms over 60 days

C.3.4 Stress and Sensitivity Testing

Mulsanne depends, to a large extent, on its reinsurance programme in mitigating risk. Hence the credit risk arising from these arrangements needs to be appropriately managed. The risk of reinsurers suffering a credit downgrade is therefore one of the stresses considered as part of the ORSA process. Due to the diversification of reinsurers, Mulsanne is relatively resilient to this risk.

C.4 Liquidity Risk

C.4.1 Material Risks

Liquidity risk is the risk of losses from an inability for Mulsanne to pay its liabilities as they fall due. The Company has a low level of liquidity risk, for those assets supporting technical provisions, due to the nature of its investment portfolio and the amount of funds held with banks on short terms deposits. The Company therefore does not have any material liquidity risk exposure.

C.4.2 Material Risk Concentrations

There are no material liquidity risk concentrations due to the diversified nature of Mulsanne's investment portfolio.

C.4.3 Risk Mitigations

Liquidity risk is mitigated through the carefully structured and diversified investment portfolio and the funds held withbanks. Additionally the Investment Committee meets regularly to review the liquidity position of the Company.

C.4.4 Stress and Sensitivity Testing

Liquidity risk is not subject to separate stress and sensitivity testing as the risk is not considered to be material to Mulsanne.

C.4.5 Expected Profit in Future Premiums

The expected profit in future premium as at 31 December 2021 is £Nil (2020 - £39k).

C.5 Operational Risk

C.5.1 Material Risks

Operational risk arises from failed internal processes, procedures or controls, from personnel or systems failures, from external events or from a failure to comply with legislation, regulations or other obligations. Reputational risks have also been considered in this category.

Mulsanne has identified the following key operational risks:

- Sabotage from internal sources including viruses, loss of intellectual property or paralysis of systems
- Cyber Risks from external sources
- Embezzlement and Fraud
- Failure of key outsourced service providers
- · Breach of GDPR data protection rules
- Incomplete MI
- Failure to identify and manage conflicts of interest

Operational risks are identified, assessed and set out in Mulsanne's risk register, along with appropriate controls. There is a process for regular reporting of risk events.

The Risk Register is discussed on a regular basis by the Risk and Audit Committee and Mulsanne Board, with input from all relevant functions and activities within the business.

C.5.2 Material Risk Concentrations

There are no material risk concentrations.

C.5.3 Risk Mitigations

Mulsanne has a strong internal control framework to mitigate operational risk. This encompasses the following key controls in managing operational risk:

- Regular audits of key service providers
- Four-eyes controls over all key operational areas
- Appropriate Disaster Recovery and Business Continuity Plans
- · Detailed analysis and review of monthly management information
- Oversight, monitoring and audit of the claims-handler
- Establishment and maintenance of a conflicts of interest register
- Involvement of Directors in all key operational areas of the business
- Board discussion of all negative publicity
- Regular dialogue with key stakeholders, including regulators and intermediaries
- Monitoring limits on complaints
- Monitoring and reporting by the Compliance function

C.5.4 Stress and Sensitivity Testing

Operational risk is included in the Standard Formula, with an appropriate risk charge calculated. In addition, a number of operational risks would directly impact underwriting risk and are therefore also captured. As part of the ORSA process, Mulsanne also considers those risks which may not be fully captured in the Standard Formula, in particular the exposure to outsourced service providers and various reputational risks. These risks are managed through appropriate controls and other mitigating actions, such as close involvement of the Board in all key operational decisions.

C.6 Other Material Risks

On 31 January 2020, the UK formally left the European Union, and the UK and the EU have entered into a Trade and Cooperation Agreement which was provisionally applied from 1 January 2021

As all of Mulsanne's business is with customers located in the United Kingdom, the Board does not anticipate Brexit having an impact on Mulsanne's ability to continue to trade. Brexit has however disrupted the supply chain for repair parts for motor vehicles, particularly when the supply of these parts is from within the European Union, with such delays giving rise to additional repair costs. The Board continue to monitor this situation closely making underwriting adjustments as appropriate.

In response to Covid-19, Mulsanne invoked its business continuity plan. At the time of writing this report Mulsanne and all of its key outsourced service providers are remote working where appropriate. This has not given rise to any material operational issues and Mulsanne's systems of control continue to operate as normal.

The Board continues to monitor developments as they occur to ensure that actions are taken to mitigate any potential adverse impact as far as possible.

D. Valuation for Solvency Purposes

D1. Assets

The following bases, methods and assumptions have been used in valuing each material class of assets of Solvency II purposes.

The material classes of assets as at 31 December 2021, except for reinsurance technical provisions, are as set out in the table below:

	2021		20	20
Description	Solvency II Value	GAAP Value	Solvency II Value	GAAP Value
	£'000	£'000	£'000	£'000
Intangible Asset	-	149	-	229
Equities (Unlisted)	11,809	11,809	12,664	12,664
Government Bonds	-		-	
Corporate Bonds				
Collateralised securities	-		-	
Collective Investment Undertakings	36,694	36,694	19,593	19,593
Derivatives	14002	0	0	0
Deposits other than cash equivalents	0		8,961	8,961
Other Loans and mortgages	10,595	10,595	4,876	4,876
Insurance and Intermediaries Receivables	-	16,837	-	4,912
Reinsurance Receivables	4,009	4,009		0
Receivables (trade, not insurance)	0	0	558	558
Cash and cash equivalents	20,086	20,086	29,323	20,642
Deferred Acquisition and Processing Costs	-	8,137	-	2,200
Any Other Assets	333	224	0	68

D.1.1 Intangible Assets

At 31 December 2021, Mulsanne held an intangible asset valued at £149k (2020 – £229k) under GAAP, representing software acquisition and development costs. For GAAP purposes, this asset has been valued on an amortised cost basis, and no significant estimated or judgements have been used.

As the asset is used within the group, it will not result in a cash flow, does not have a readily ascertainable market value and no active market exists, no value has been ascribed to it for Solvency II valuation purposes. There have beenno changes in recognition and valuation bases during the year.

D.1.2 Equities (Unlisted)

As at 31 December 2021 the Company holds several unlisted Equity investments. Various valuation techniques have been used at arriving at the valuation for both a GAAP and Solvency II basis. Such valuations have been arrived at with the assistance of a third-party investment advisor.

D.1.3 Bonds

At the year end, Mulsanne had no direct investments in government or corporate bonds, however, the Company had a £2 million indirect investment in corporate bonds through a highly diversified listed fund.

Investments are valued at fair value, being the market prices for identical assets in active markets, and the valuations are the same for GAAP and Solvency II purposes, although GAAP valuations exclude accrued interest. No significant judgements or estimates are used, and there has been no change in the basis of recognition and valuation.

D.1.4 Collective Investment Undertakings

At the end of 2021, the Company held investments in several investment funds totaling £36.7m (2020: £19.5m). These funds are invested into highly diversified funds that include underlying investment in trade receivables, mortgage finance, bridging and development finance in respect of UK properties, corporate bonds, and equities and diversified money market funds. The majority of the funds are listed and therefore have readily ascertainable market values and assets are valued based on the latest NAV valuations both for GAAP and for Solvency II, with no significant estimate or judgements being utilised. In circumstances where a market value of an investment is not readily available the Company uses the services of an independent investment advisor to perform an annual valuation of the investment. There has been no change in the valuation and recognition basis during the year. For GAAP purposes, these investments were included in the same category as bonds and other fixed income investments.

D.1.5 Derivatives

As at 31 December 2021 the Company held a currency forward position selling US Dollars a buying sterling at a forward future date. This position is used to hedge the currency risk arising from holding certain strategic investments. As these currencies are actively traded and therefore have readily ascertainable market values and assets are valued at market value both for GAAP and for Solvency II, with no significant estimate or judgements being utilised. As at 31 December 2021 the company had sold £18.52m for a forward value of £13.7m. The currency forward counterparty is a highly rated bank. The value of the currency forward is reviewed regularly and adjusted accordingly to reflect any changes to the underlying value of the assets.

For GAAP purposes, derivative assets and liabilities are shown gross, whereas for Solvency II purposes a net position has been reported, representing Mulsanne's exposure.

D.1.6 Deposits, Cash and Cash Equivalents

At the year end, Mulsanne held £20.1m (2020 – £38.2m) either in term deposits, or in cash and cash equivalents, inclusive of accrued interest, with banking counterparties. All amounts are held in GBP and either in the UK or in Gibraltar.

Deposits, cash and cash equivalents are valued at fair value, based on the actual balances held, and Mulsanne receives weekly or monthly statements.

The valuation of these assets is the same for GAAP and Solvency II and no estimates or judgements have been used. For GAAP purposes accrued interest is reported separately. There has been no change in the basis on which these items are valued and recognised.

D.1.7 Insurance and Intermediaries Receivables

Insurance and intermediaries' receivable items on a GAAP basis represent premiums owed to Mulsanne from its brokers, less commission and including IPT and including the amount owed to its coinsurance partner. At the year end, the Company was owed £16.8m (2020 – £4.9m). Contracts with the brokers set out payment terms.

Premiums receivable are valued at fair value, being the amounts recoverable, and as no other amounts are overdue, there have been no significant estimates or judgements made in arriving at the valuation. There has been no change in the valuation and recognition basis during the year.

While the assets are valued on a consistent basis both for GAAP and Solvency II, for Solvency II valuation purposes premium debtors net of the premium relating to Mulsanne's coinsurance partner are set against technical provisions to the extent that they are not overdue. The remaining balance under Solvency II represents the net coinsurance balance.

D.1.8 Reinsurance receivables

The balance ascribed in the Solvency II basis includes amounts due from reinsurers for settled claims above the excess of loss retention amounting to £Nil (2020: £Nil)

D.1.9 Receivables (trade, not insurance)

	2021	2020
Intercompany receivable	8,462	8,462
Taxation debtor	0	0
Other debtors	4,000,617	550,000
	4,009,079	558,462

Other debtors in 2021 include debtors arising from co-insurance and amounts receivable in respect of investments. The amounts due to/from coinsurers are reported on a net basis and this has historically included premiums due to coinsurers less claims, commissions and other expenses. The coinsurance arrangements were not renewed in 2021 and as a result these arrangements are now in run-off resulting in a debtor position arising as no further new business is attaching to these arrangements. All amounts due are within credit terms.

These items are valued at fair value, being amounts recoverable and significant estimates or judgements are required. There are no differences in valuation for GAAP and Solvency II purposes and there has been no change in the valuation and recognition during the year.

D.1.10 Deferred Acquisition and Processing Costs

Deferred acquisition and processing costs represent commission, policy administration and similar expenses directly related to the acquisition and processing of policies, which are deferred over the period relating to the underlying unearned premiums. As at 31 December 2021, Mulsanne had £7,467,979 (2020 – £1,375,676) of deferred acquisition costs and £669,253 (2020 – £824,545) of deferred processing costs.

The Solvency II balance sheet is prepared on the basis of best estimates of future cash flows. Deferred acquisition costs do not result in future cash flows and these amounts are therefore excluded from the Solvency II balance sheet. There has been no change in the recognition and valuation basis during the year.

D.1.11 Other Assets

Other assets of £224,236 (2020 - £67,723) on a GAAP basis represent accrued interest and prepayments. On a Solvency II valuation basis, accrued interest is allocated to the relevant investment to which it relates. Prepayments do not result in cash flows and therefore do not have a Solvency II value.

D.2 Technical Provisions

Technical Provisions represent the insurance liabilities as at the reporting date. Mulsanne's gross and net Technical Provisions by business line are set out in the table below:

	As at 31 December 2021				
	Miscellaneous				
	Motor Liability	Other Motor	Financial Loss	Assistance	Total
	£'000	£'000	£'000	£'000	£'000
Gross Best Estimate Technical Provisions	129,294	5,726	51	127	135,198
Risk Margin	1,504	33	1	2	1,539
Total Gross Technical Provisions	130,798	5,759	52	129	136,737
Reinsurance Recoverables	(93,725)	(3,932)	-	-	(97,657)
Net Technical Provisions	37,073	1,827	52	129	39,081

	As at 31 December 2020				
	Miscellaneous				
	Motor Liability	Other Motor	Financial Loss	Assistance	Total
	£'000	£'000	£'000	£'000	£'000
Gross Best Estimate Technical Provisions	88,685	3,580	50	142	92,457
Risk Margin	913	63	2	4	982
Total Gross Technical Provisions	89,598	3,643	51	147	93,439
Reinsurance Recoverables	(58,742)	(1,523)	-	-	(60,265)
Net Technical Provisions	30,856	2,120	51	147	33,174

D.2.1 Bases, Methods and Assumptions

D.2.1.1 Best Estimate

The starting point for the valuation of technical provisions is the best estimate of claims costs, both on an earned and on an unearned exposure, for all business written at the valuation date. This assessment is carried out by the independent, external actuary.

Management then apply payment patterns to the actuarial best estimate, based on historical payment patterns from RTP and applying reasonable assumptions and judgements, to convert the best estimate to future cash flow.

D.2.1.2 Expenses

The cost of running off the existing insurance obligations is estimated, on the basis that the company will continue to write other business. This is based on the current levels of expenditure and takes due account of decreasing activity in the existing business lines.

D.2.1.3 Events Not in Data

There may be possible future events which are not reflected in the historical data of the Company or the market. Such events are referred to as Events Not in Data ("ENIDs").

Mulsanne considers a number of scenarios and events which could occur and assesses their potential impact. Where this assessment concludes that the negative impact of ENIDs (i.e. increasing reserves) is greater than the potential positive impact (i.e. decreasing reserves), the Company makes provision for such events.

At 31 December 2021, management made a provision for ENIDs of £349k (2020 - £142k) based on the recommendation of the independent Actuarial Function Holder services provider.

D.2.1.4 Bound but not Incepted

Mulsanne may be contractually obligated to write certain business at the year end, although the risks will not incept until the following year. For example, renewal business for January 2022 will be invited prior to 31 December 2021. This may, however, be wholly or partially offset through future cancellations of existing business.

On a statutory account basis, a provision has been made in the current year for bound but not incepted risks, although the impact on the solvency position is not material.

D.2.1.5 Discounting

Cash flows are discounted using the risk-free interest rate structure as provided on a monthly basis by EIOPA.

D.2.1.6 Risk Margin

The risk margin is calculated using simplification method 3. This assumes that future SCRs are proportional to the best estimate technical provisions over time and projects future SCRs at this rate. A cost of capital rate of 6% is applied to each SCR estimate and discounted back using EIOPA yield curves.

D.2.1.7 Allocation to Lines of Business

Best estimates and cash flows are calculated separately for each line of business. However, the majority of Mulsanne's business comprises motor, which is required to be split for Solvency II purposes into motor liability and other motor. It is not normal practice in the UK market to rate motor business on this basis, and Mulsanne therefore needs to apply a different methodology to calculate this split.

The Company uses claims heads of damage to split its motor business into the Solvency II classes. Bodily injury and third-party property damage are allocated to motor liability, with accidental damage, windscreen, fire and theft being allocated to other motor.

D.2.1.8 Reinsurance Recoverables

Mulsanne has reinsurance recoverables arising from its Excess of Loss and Quota Share arrangements. Such items are calculated on a consistent basis with gross technical reserves, reflecting best estimates of both expired and unexpiredrisks, converted to cash flows and discounted at the appropriate risk-free rate.

Amounts due from and payments due to reinsurers are included in the technical provision to the extent they are not overdue. The calculation also makes allowance for the possibility of insurer default, based on the counterparty's ratingand the level of exposure.

D.2.1.9 Simplifications

No material simplifications have been used in the calculation of technical provisions.

D.2.2 Uncertainty

Technical provisions require judgement and estimations and therefore contain an element of uncertainty. Key areas of uncertainty in Mulsanne's technical provisions are:

- Outstanding reserves: Reserves on reported claims are based on reasonable estimates, reflecting informationknown at the balance sheet date. Ultimate settlement of these claims may differ from estimates.
- Future losses: Future losses arise on both expired and unexpired risks and the estimation of these losses is based on actuarial assumptions. Such assumptions will take account of past performance and known or anticipated future changes, and may ultimately prove to differ from actual experience.
- Other estimates: Technical provisions include assumptions as to expenses, events not in data and bound but not incepted risks. While these assumptions are prepared on a best estimate basis, reflecting historical experience where appropriate, they could ultimately prove to be inappropriate.
- Legislative and market factors: The UK motor market has been subject to material changes in the past, encompassing legislative, economic and behavioral changes. Similar changes in the future are difficult to predict, but could ultimately impact best estimates and future cash flow.

Mulsanne seeks to minimise the level of uncertainty through a robust process involving external actuarial advice. Claims performance is closely monitored to ensure that changes in trends are identified and appropriately reflected in future projections.

D.2.3 Differences between Solvency II and GAAP Valuation

The starting point for both Solvency II and GAAP valuation of technical provisions is the actuarial best estimate reserves. Key differences between the valuation bases are:

- GAAP valuation of gross reserves may include a margin above best estimate. Solvency II valuation is required to be at best estimate and any margin is removed
- GAAP valuation includes unearned premium, being the premium which reflects the unexpired risk exposure.
 Under Solvency II, the unearned premium is replaced by future claims expected to arise on this unearned exposure.
- GAAP reserves do not include run-off expenses
- GAAP reserves to not include events not in data
- GAAP reserves do not make allowance for bound but not incepted business
- GAAP reserves are calculated without a risk margin
- Insurance and intermediary receivables are set against total gross technical provisions for Solvency II
 valuation purposes, to the extent that they are not overdue, while they are shown as a separate item on the
 balance sheet for GAAP reporting
- Reinsurance receivables and payables are set against technical provision reinsurance recoverables for Solvency II valuation purposes, to the extent that they are not overdue, while they are shown as a separate items on the balance sheet for GAAP reporting

The table below shows the movement from GAAP technical provisions to Solvency II technical provisions.

	As at	As at 31 December 2021		
	Gross Technical	Gross Technical Reinsurance Re		
	Reserves	coverables	Total	
	£'000	£'000	£'000	
GAAP Reserves	163,286	125,999	37,287	
Remove Unearned Premium	(61,650)	(50,076)	(11,574)	
Claims on Unexpired Risks	49,193	32,904	16,290	
Receivables/Payables	(13,923)	(8,341)	(5,582)	
Run-off Expenses and Other Adjustments	2,218	(30)	2,248	
Effect of Discounting	(3,926)	(2,798)	(1,127)	
Risk Margin	1,539		1,539	
Solvency II Technical Provisions	136,737	97,657	39,081	

	As at 31 December 2020		
	Gross Technical Reserves	Reinsurance Re coverables	Total
	£'000	£'000	£'000
GAAP Reserves	98,531	70,852	27,679
Remove Unearned Premium	(22,152)	(12,064)	(10,088)
Claims on Unexpired Risks	17,780	8,109	9,671
Receivables/Payables	(2,726)	(185)	(2,541)
Run-off Expenses and Other Adjustments	1,378	(6,073)	7,451
Effect of Discounting	(355)	(374)	19
Risk Margin	982		982
Solvency II Technical Provisions	93,439	60,265	33,174

D.2.4 Transitional adjustments

Mulsanne has not used any transitional adjustments with regard to the matching adjustment, volatility adjustment, transitional risk-free interest rate term structure or transitional deduction.

D.2.5 Changes over the Period

There have been no changes in the assumptions made since the previous period.

D.3 Other Liabilities

The following bases, methods and assumptions have been used in valuing each material class of liabilities for Solvencyll purposes.

The material classes of liabilities as at 31 December 2021, except for gross technical provisions, are as set out in the table below:

	As at 31 December 2021		
Description	Solvency II Value	GAAP	
	£'000	£'000	
Insurance & intermediaries payables	-	-	
Reinsurance payables	-	10,708	
Derivatives	14,002	-	
Payables (trade, not insurance)	6,789	6,789	
Deferred acquisition cost - reinsurer's share	-	7,189	
Deferred Co-insurance commission	-	-	
Deferred Reinsurance commission		6,582	

	As at 31 December 2020		
Description	Solvency II Value	GAAP	
	£'000	£'000	
Insurance & intermediaries payables	338	1,616	
Reinsurance payables	-	6,564	
Derivatives	8,681	-	
Payables (trade, not insurance)	2,609	2,609	
Deferred acquisition cost - reinsurer's share	-	443	
Deferred Co-insurance commission	-	280	
Deferred Reinsurance commission	-	1,980	

D.3.1 Insurance and Intermediaries Payables

Mulsanne cedes premium to a co-insurance partner under a co-insurance agreement. Settlements with the co-insurance partners are made on a monthly basis, and this item represents the net amount due for settlement, being premiums owed less claims, less commission due to Mulsanne. At 31 December 2021 Mulsanne owed £1,239,593 (2020 – £1,616,380).

The balance is valued at fair value, being the amount that is due for settlement. The key estimate in deriving the balance is the actuarial best estimate loss ratio, as this drives the commission receivable, which varies depending on the performance of the business.

The valuation basis is the same for GAAP and Solvency II purposes; although for Solvency II purposes the premium debtors not yet collected owed to the co-insurance partner have been set against the amount owed. The resulting balances are included in insurance and intermediary receivables. There have been no changes in the valuation approach during the year.

Reinsurance Payables

As at 31 December 2021 Mulsanne had reinsurance payables of £Nil (2020 – £6,564,134) on a GAAP basis, being payments due under the Quota Share and Excess of Loss arrangements. The amount due under the Excess of Loss

arrangement represents premium above the deposit premiums paid during the year. The amount due under the Quota Share arrangement represents the reinsurer's share of premiums net of claims and commission to Mulsanne which has not yet been settled. Settlements are made in arrears on a monthly basis.

These amounts are valued at fair value, being the actual amounts payable. The key estimate in deriving the Quota Share balance is the actuarial best estimate loss ratio, as this drives the commission due to Mulsanne, which varies with the performance of the business.

There have been no changes in the valuation and recognition basis during the year, and there are no differences in the underlying valuation for GAAP and Solvency II. However, for Solvency II purposes these items, to the extent they are not considered overdue, are set against technical provisions reinsurance recoverables, whereas under GAAP they are shown separately on the balance sheet.

D.3.2 Derivatives

As set out under assets, the Company's derivative position has been reported gross for GAAP purposes, but is netted down for Solvency II reporting.

D.3.3 Payables (trade, not insurance)

Other payables comprise certain costs, including taxes, due at 31 December 2021 are as set out below:

	2021	2020
Insurance premium tax payable	4,683,008	1,552,032
Amount due to Related Party	32,294	22,338
Claims Handling Cost Provision	112,713	230,033
Other creditors	-	-
Accruals	1,960,868	804,150
	6,788,884	2,608,553

These items are valued at fair value, being the amounts payable, and are valued consistently under Solvency II and GAAP. There have been no estimates or judgements and no changes in the recognition and valuation basis.

D.3.4 Deferred acquisition cost - reinsurer's share

Deferred acquisition costs – reinsurer's share is the portion related to reinsurer's share of the commission and similar expenses directly related to the acquisition of policies, which are deferred over the period relating to the underlying unearned premiums. As at 31 December 2021, Mulsanne had £5,644,050 (2020 – £442,547) of deferred acquisition costs.

The Solvency II balance sheet is prepared on the basis of best estimates of future cash flows. Deferred acquisition costs do not result in future cash flows and these amounts are therefore excluded from the Solvency II balance sheet. There has been no change in the recognition and valuation basis during the year.

D.3.5 Deferred Co-insurance and Reinsurance Commission

Mulsanne receives commission from its co-insurance and reinsurance partners. This is earned in line with the underlying premium and commission relating to premium unearned at the reporting date is deferred to future periods. As at 31 December 2021, Mulsanne had a total of £6,582,097 (2020 - £2,259,699) of deferred commission.

The Solvency II balance sheet is prepared on the basis of best estimates of future cash flows. Deferred co-insurance

and reinsurance commissions do not result in future cash flows and these amounts are therefore excluded from the Solvency II balance sheet. There has been no change in the recognition and valuation basis during the year.

E. Capital Management

E.1 Own funds

E.1.1 Management of Own Funds

E.1.1.1 Objectives, Policies and Processes in Managing Own Funds

Mulsanne has in place a Capital Management Policy to ensure that the Company has the appropriate levels and quality of capital to meet both the SCR and the internal view of capital as determined by the ORSA. The intention is for capitalrequirements to be met in both the immediate and medium-term future.

While Mulsanne's ORSA process is carried out formally on an annual basis, the capital requirements and own funds to meet these requirements are considered at least quarterly as part of the quarterly regulatory reporting process. The Board discusses the Company's capital position at all meetings as part of its risk management processes and monitors ongoing performance through monthly management accounts.

Unusual products which may be considered to improve the capital position, such as the LPT purchased in April 2019, will undergo a thorough review, discussion and challenge by the Board and Regulator to assess their appropriateness given the Company's risk profile and appetite. Similarly any unusual investments will be thoroughly reviewed to consider the SCR implications and compliance with the prudent person principle.

There have been no changes in capital management policies or processes during the period.

E.1.1.2 Time Horizon for Business Planning and Material Changes

Mulsanne's business planning period for capital management encompasses a three-year time horizon, with emphasis on the current and next year. Given the unpredictability and historic volatility of the UK motor market, a longer time horizon would not be realistic. There have been no changes in the planning time horizon over the year.

E.1.2 Description of Own Funds

E.1.2.1 Structure, Amount and Quality of own funds

Mulsanne currently only has basic own funds and no ancillary own funds. Own funds are comprised entirely of Share Capital, Share Premium and the Reconciliation Reserve and therefore all qualify as Tier 1 funds. In March 2021, 6,146 Ordinary fully paid-up shares were issued to Ormiston Holdco Limited for a consideration of £2.236 million. There were no other changes during the year. The table below sets out Mulsanne's own funds at 31 December 2021, together with movements during the period:

As at 31 December 2021 Reconciliation Share Capital **Share Premium** Deferred Tax asset **Total Own Funds** Reserve £'000 £'000 £'000 £'000 £'000 At 1 January 2021 92 34,776 (6,730)28,138 Capital Injections during the year 2,236 6 2,230 Movement in the Reconciliation Reserve 6,949 6,949 At 31 December 2021 98 37,006 219 333 37,656

	As at 31 December 2020			
	Share Capital Share Premium		Reconciliation Reserve	Total Own Funds
	£'000	£'000	£'000	£'000
At 1 January 2020	43	10,107	(3,964)	6,186
Capital Injections during the year	49	24,669		24,718
Movement in the Reconciliation Reserve			(2,766)	(2,766)
At 31 December 2020	92	34,776	(6,730)	28,138

The Company's Reconciliation Reserve effectively represents retained earnings on a Solvency II valuation basis. There are no foreseeable dividends.

E.1.2.2 Terms and Conditions of Own Funds

Mulsanne's Own Funds are fully comprised of Tier 1 funds and have no terms or conditions attached and there are no restrictions affecting the availability and transferability of the Company's Own Funds. The Own Funds are not redeemable and do not carry any guaranteed dividend or other return.

E.1.2.3 Difference in Own Funds between Financial Statements and Solvency II Valuation

The difference in the valuation of Own Funds as shown in the Financial Statements compared to the Solvency II valuation is due to the valuation differences in the underlying assets and liabilities, as set out in the table below.

	2021	2020
	Own Funds	Own Funds
	£'000	£'000
Own Funds per Financial Statements	39,985	33,446
Difference in Valuation of net Technical		
Provisions	(7,922)	(2,615)
Removal of Deferred Acquisitions and		
Processing Costs	(1,006)	(2,200)
Removal of Intangible Assets	(149)	(229)
Removal of Prepayments	(166)	(68)
Removal of Deferred Commissions	6,582	2,789
Capital Add-On	-	(2,985)
Deferred tax Asset	333	-
Own Funds per Solvency II Valuation	37,656	28,138

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.1 SCR and MCR

Mulsanne's SCR and MCR coverage is set out below:

	2021	2020
Own Funds	37,656,335	28,138,416
Solvency Capital Requirement	21,517,042	16,329,477
SCR Coverage	175.01%	172.30%
Minimum Capital Requirement	5,618,784	4,802,096
MCR Coverage	664.27%	586.00%

All capital is Tier 1 and therefore fully eligible to cover the SCR and MCR.

In accordance with the Solvency II standard formula a firm's SCR Non-Life underwriting risk is predominantly a function of firm's volume measure for premium and reserve risk. Such volume measures are determined by taking the higher of the premium and reserve risk volume for the previous 12 months or following 12 months as at the calculation date. Such volume measures are the amounts net of reinsurance.

E.2.2 SCR by Risk Module

The following table sets outs Mulsanne's SCR broken down by risk module:

	2021	2020
SCR Risk Category	£	£
Market Risk	8,779,045	6,671,036
Counterparty Risk	3,519,343	2,836,900
Non-Life Underwriting Risk	10,729,630	8,371,106
Diversification	(5,566,924)	(4,323,282)
Basic Solvency Capital Requirement	17,461,094	13,555,761
Operational Risk	4,055,948	2,773,716
Solvency Capital Requirement	21,517,042	16,329,477

E.2.3 Simplifications

No simplified calculations have been used in applying the standard model and no undertaking specific parameters have been used.

E.2.4 Inputs used to Calculate the MCR

The following inputs have been used to calculate the Company's MCR:

	As at 31 Dec	As at 31 December 2021		
	Net (of reinsurance) best estimate technical provisions	Net (of reinsurance) written premiums in the last 12 months		
	£'000	£'000		
Motor Vehicle Liability	35,569	23,451		
Motor Vehicle Other	1,794	2,319		
Assistance	127	504		
Miscellaneous Financial Loss	51	53		
		£'000		
Linear MCR		5,619		
SCR		21,517		
Combined MCR		5,619		
Absolute Floor of the MCR		3,126		
Minimum Capital Requirement		5,619		

	As at 31 De	As at 31 December 2020		
	Net (of reinsurance) best estimate technical provisions	Net (of reinsurance) written premiums in the last 12 months		
	£'000	£'000		
Motor Vehicle Liability	29,943	20,155		
Motor Vehicle Other	2,058	1,460		
Assistance	142	627		
Miscellaneous Financial Loss	50	78		
		£'000		
Linear MCR		4,802		
SCR		16,329		
Combined MCR		4,802		
Absolute Floor of the MCR		3,338		
Minimum Capital Requirement		4,802		

E.2.5 Changes over the Period

There has been no material change to the Company's SCR or MCR during the period.

E.3 Non-Compliance with Minimum Capital Requirement or Solvency Capital Requirement

There have been no instances of Mulsanne not complying with the SCR or MCR during the reporting period.
